

SURGE SUPPORT SERVICES

**PROVEN
EXPERTISE.
RAPID SUPPORT.**

Since 1985, Advanced Technology Services has been a trusted maintenance and reliability partner for leading manufacturers. Whether you are looking for short-term support, expert consultation or a long-term maintenance solution, ATS provides the skilled workforce, best-in-class processes and Industry 4.0 technologies to increase productivity and reduce costs.

Short-Term Maintenance Projects

- **Supplemental Maintenance Support:**

Skilled, multi-craft technicians available for short-term assignments to help execute PMs, repairs, installations or project-specific work—on your schedule and at your site.

- **Machine Health Assessments:**

Temporary sensor deployments and expert analysis from our Reliability 360® team to help assess asset condition, detect early failure indicators and prioritize maintenance actions.

- **Asset Reliability Projects:**

Targeted initiatives such as root cause analysis, PM optimization or equipment assessments designed to improve performance and reduce unplanned downtime.

- **Technical Training Programs:**

Short-term, hands-on training engagements delivered through our SkillPoint™ program—customized to upskill your team in key areas like mechanical systems, electrical, fluid power or automation.

- **MRO Asset Management:**

Temporary support to organize and optimize your storeroom, capture and track repairable parts or implement best practices in inventory control.

Expert Support When You Need It Most

Whether you're navigating a surge in production, labor shortages or other short-term challenges, ATS is ready to deliver on-site support exactly when and where you need it. With national coverage and strategically located regional hubs, we can quickly deploy skilled technicians from nearby locations—minimizing travel costs while maximizing responsiveness. Any shift. Any day.

Maintenance & Technical Roles

- **Multi-craft Maintenance Technicians:** Skilled in electrical, mechanical and controls systems
- **Controls Technicians & Engineers:** Experienced with troubleshooting and maintaining automation systems
- **Maintenance Planners/Schedulers:** Optimize work order flow and resource coordination
- **Material Specialist & Crib Attendants:** Ensure parts availability and inventory control
- **Machine Health Assessment Technicians:** Conduct diagnostic reviews of asset performance

Production Support Roles

- **Machine Operators:** Ready to run complex production equipment across shifts
- **Welders:** Certified to meet safety and quality standards
- **Packaging & Injection Molding Operators:** Experienced in high-volume production environments
- **Forklift Operators:** Trained and licensed for safe material handling

Why Choose ATS?

ATS delivers rapid response to evolving workforce needs, offering all-shift, weekend, and overtime coverage when required. Nationwide deployment enables on-site supervision, and every technician arrives with a reliability mindset shaped by ATS's strong safety culture. Backed by deep resources and proven support systems, ATS is prepared to keep operations running smoothly.
