

TECHNICAL WORKFORCE SOLUTION

SOLVING YOUR SHORTAGE OF TOP-TIER TECHNICAL TALENT

OUR PROMISE

**TOP-TIER
TALENT.**

**OPTIMAL
PRODUCTIVITY.**

**EXCEPTIONAL
RELIABILITY.**

Solving the widespread industry challenge of finding top-tier technical talent in manufacturing has never been more difficult. A high degree of strategic planning and expertise in the area of factory maintenance performance is required when looking to successfully recruit, train and retain a highly skilled technical workforce.

If your organization is struggling to fill gaps in your technical workforce, you are not alone. According to data from the Census Bureau's Quarterly Survey of Plant Capacity Utilization, 20.6% of manufacturing plants in the US that failed to produce at their full capacity cited supply of labor or labor skills as a key constraint in their production.

Coupling the skills gap with other manufacturing pressures such as supply chain challenges, changes in industry trends and technology advancements, you may find yourself, your team and your production objectives at risk due to costly downtime brought on by a shortage of technical labor.

ATS knows these challenges well. With decades of experience in factory maintenance, the foundation of our service delivery and performance is built on the expertise that keeps the skills gap from disrupting our customer's success. Today, our Technical Workforce Solution can provide you with a full range of highly skilled technical talent across various functional areas, from reliability engineering, to factory equipment maintenance, to automation services, and more. Our safety-trained, multi-crafted workforce collaborates with your staff to meet daily production objectives and solves difficult engineering or maintenance issues with exceptional reliability.

Rather than investing expensive time, effort, and resources in attracting and retaining skilled maintenance technicians, contact us to learn how we can provide a long-term, sustainable strategy that delivers optimal productivity through decreased downtime and greater efficiency, resulting in greater profitability for your business.
